

RAYMOND ALEX HINDS

PROFESSIONAL SUMMARY

Newly graduated and ambitious Web Developer bringing enthusiasm and detailed understanding of various programming languages to webpage planning, development and maintenance. Experience designing and developing sites from concept to roll out. I am efficient and self-motivated and looking for a new challenge to learn and work hard. I have excellent communication skills with keen attention to detail and the ability to work well with others as well as with little or no supervision. Seeking the opportunity to showcase my skills as well as learn new ones.

WORK HISTORY

Hybrid Operator, 11/2019 to 07/2020

Oasis Data Management - Crickhowell, Powys

- Handled patient data entry and scanning using Box-IT software for accurate surgery records.
- Importing surgery records from excel spreadsheet to database and ensuring data integrity.
- Liaising with clients to understand any concerns, documents or records that are required.
- Moved client records around warehouse using different machinery, ensuring adherence to health and safety policies at all times.
- Checked in client records, logging and filing accurate paperwork for data inventory.

Waiter, 10/2017 to 10/2019

The Bear Hotel - Crickhowell, Powys

- Assisted customers with menu selection, offering knowledge of current special dishes and personal recommendations to build rapport.
- Processed cash and card payments promptly, minimising customer waiting times and enabling swift table turnarounds.

- Checked in with customers during meals to check orders were received correctly and met guests' expectations.
-

EDUCATION

Bachelor of Science, BA (Hons) Information Technology (1st), 01/2022

London South Bank University - London, ENG

- Application Development - This module provided understanding of different programming languages such as HTML, CSS, JavaScript & PHP along with different use cases through practical work.
- Web Technologies - This module consist of how dynamic client applications are built and held on remote servers. It explores the interactions between database files and client interface. It also represents the fundamental architecture for application and mobile apps.
- ICT Project management in Practice - This module gives students the opportunity to collaborate on different ICT projects. Students are required to go through the full development lifecycle from requirements elicitation to testing and deployment. The Final project also involved real clients with genuine expectations.
- Data Mining & Big Data Analytics - This module provided the basic concepts and understanding in the techniques of data mining and the role they play in business analytics.

Foundation Degree in Science, Information Communication Technology, 07/2019

University of South Wales - Pontypridd, RCT

HOBBIES AND INTEREST

- Football - Avid Manchester United fan, I enjoy going to the gym and playing football with friends.
 - Travelling - I am interested in having the ability to travel to different destinations and learning different cultures.
-
